

POST-OPERATIVE PAIN IS STILL THE #1 PATIENT FEAR¹

Differentiate your practice by providing your patients more than just pain relief. Provide them Superior Pain Control with the ambIT[®] Electronic Ambulatory Infusion Pump.

- ▶ INCREASE PATIENT SATISFACTION
- ▶ REDUCE THE NEED FOR NARCOTICS AND THEIR POTENTIAL SIDE EFFECTS
- ▶ MINIMIZE CALLS DUE TO UNCONTROLLED PAIN
- ▶ PROVIDE THE LATEST PAIN CONTROL TECHNOLOGY

MORE THAN PAIN RELIEF ...SUPERIOR PAIN CONTROL™

Features of ambIT® that contribute to superior pain control:

- ▶ Patient-controlled bolus infusion to control breakthrough pain
- ▶ Programming flexibility to meet the unique needs of each patient
- ▶ Microprocessor-controlled accuracy (+/-6%)
- ▶ Easily attaches to any sized fluid bag
- ▶ Compact and portable

ambIT® PAIN CONTROL

"I think the goal for any surgeon, when they are preparing a patient for surgery, is to get them through whatever procedure with as little pain as possible."

Catherine Ronaghan, M.D., F.A.C.S. Surgical Oncologist
Covenant Medical Center, Lubbock, TX

"I like the ambIT because it's a lightweight pump, easy for the patient to transport, it's very easy for me to program and adjust as necessary, and it's easy for the patient to administer their own bolus dosing if they have increased pain."

Robin C. Minielly, M.D., Director of Anesthesia
Covenant Medical Center, Lubbock, TX

Ask your ambIT® representative or call Summit Medical Products today to learn more about integrating the ambIT® pain control system into your practice and the post-operative care of your patients.
